

Sustainable Waste Management in Nigeria

Photos taken from Dr Ezeah Chukwunonye's PhD (2010) Analysis of barriers and success factors affecting the adoption of sustainable management of municipal solid waste in Abuja, Nigeria.

Join waste management experts from the University of Wolverhampton for a two day Continuing Professional Development course at the British Council, Abuja.

14-15 September 2011

The course will cover essential issues relating to:

- general principles of sustainable waste and resource management
- waste legislation (Nigerian and international)
- best practice case studies in recycling, composting, anaerobic digestion, engineered landfill and incineration
- integrated waste management strategies.

On completion, participants will receive a Certificate of Attendance and five postgraduate credits, which can be used towards the MSc Waste and Resource Management award offered by the University of Wolverhampton.
